## Environment and land-use planning

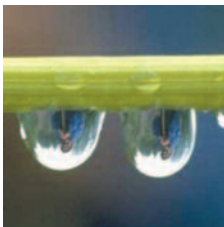

*At the heart of the quality of life*

*Because tomorrow's world lies in our hands*

# GINGER Environnement & Infrastructures

The reference in environmental engineering,  
land-use planning and our living environment.

GINGER Environnement & Infrastructures is a major leading reference in environmental engineering.

## Multidisciplinary technical skills providing a complete service

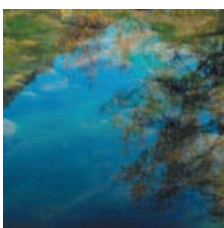

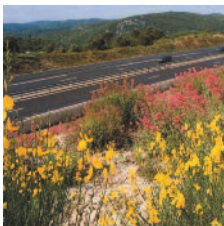

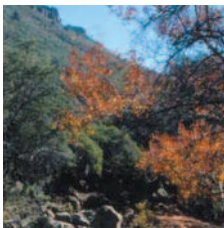

GINGER Environnement & Infrastructures, a unique structure providing a fully integrated service.

From preliminary studies to technical auditing using its own laboratories, GINGER Environnement & Infrastructures provides a full range of services including expertise, engineering, and project management.

## A wide range of customers

GINGER Environnement & Infrastructures partners a wide range of customers : administrations, local authorities, institutions, manufacturers, farmers and private individuals.

The care and attention inherent in all the services we provide have earned our engineers a well-deserved and acknowledged reputation.

## Our major assets

GINGER Environnement & Infrastructures means:

- Over 15 years of experience.
- A team of experts specialised in a range of fields: soils, surface water, groundwater, infrastructures, natural environments, etc.
- A dense coverage network, meaning that our teams and experts have excellent field knowledge and are able to promptly respond to any request from our customers.
- GINGER Environnement & Infrastructures, part of a large and independent European group, is able to intervene throughout the world.

**HYDROGEOLOGY**  
Groundwater, Treatment,  
Protection.

**SURFACE WATER**  
Floodability, Flood risk prevention  
plans, Rainwater management,  
Hydrobiology, Integrated management.

**CONTAMINATED SOILS**  
Risk assessments, Environmental liabilities.

**INDUSTRY**  
ICPE (environmental permits),  
Environmental management.

**ENVIRONMENTAL METROLOGY**  
Water, soil and air sampling and analysis,  
noise measurements, etc.

### **LAND-USE PLANNING**

#### **1 - TRANSPORT INFRASTRUCTURES**

Roadway infrastructures (roads and motorways) - Railway  
infrastructures (LGV, TER, tramway) - Civil engineering constructions.

#### **2 - URBAN DEVELOPMENT**

Urban spaces - Rest and service areas, car parks - Designated  
development areas (ZAC), trading estates - Public spaces, parks,  
landscaped areas, leisure areas - Urban networks.

#### **3 - TRAFFIC AND TRAVEL**

Traffic: vehicle counts and all types of diagnostics, modelling - simulation,  
management, control - Travel: urban travel plans, all types of development layouts,  
transport network design, exchange hubs, safety audits.

### **MARITIME & PORTS**

Port layouts, coastal management, development of tourism.

### **MODELLING**

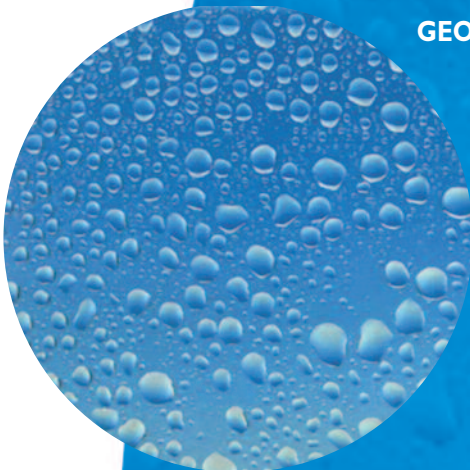

Surface water, groundwater, hydrodynamic and dispersive  
networks, atmospheric dispersion: industry, roads.

### **SEWERAGE TREATMENT AND DRINKING WATER**

Collective and individual sewerage treatment, Networks, Drinking water supply.

### **RENEWABLE ENERGIES**

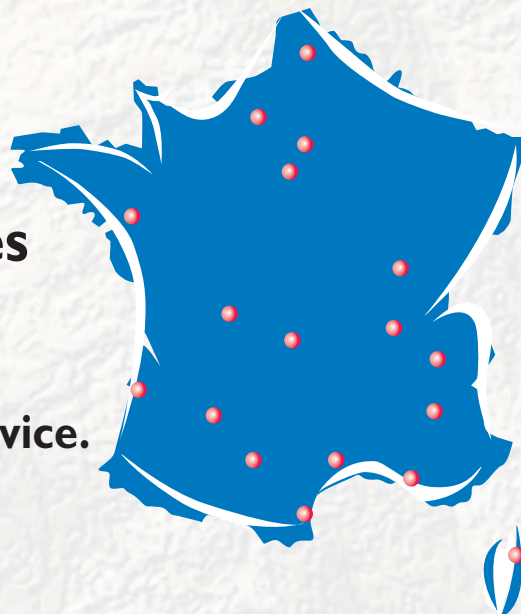

### **GEOGRAPHIC INFORMATION SYSTEMS**

*At the heart of the quality of life*

# The GINGER Environnement & Infrastructures network

Providing a local and  
highly responsive service.  
A specialist on your  
doorstep.
