SECHAUD BOSSUYT Construction Engineering

At the heart of quality of life

DESIGN WORK - ENGINEERING WORKS - PROJECT EXECUTION
ASSISTANCE FOR CONSTRUCTION - EXPERTISE

Lycée Buffon - Paris 15^{ème}
Architecte : Beau & Vanaecke

Bibliothèque François Mitterrand
Architecte : Dominique PERRAULT

Cité de la mer à Cherbourg
Architecte : J.F. Milou (Studio Milou)

Stade de Séoul (Suwon Samsung Stadium)
Architecte : A. Zubléna et M. Macary

Conservatoire de musique - Paris 9^{ème}
Architectes : Henri et Bruno GAUDIN

Hôpital de Châtelleraut
Architectes : RTV Architectes

Immeuble Saarinen à Rungis
Architecte : Arnaud Fontani

GINGER
SECHAUD BOSSUYT

Specialists in all building trades and professions and engineering of large public and private projects

SECHAUD BOSSUYT was founded in 1956 and because of its long of experience in construction, is established in construction, building, fluids, and industrial engineering,

Its aim is to serve professionals in the construction industry replying to their specific needs.

SECHAUD BOSSUYT offers the means and the capabilities project management to clients in France and abroad. It has high performance technical and technological means.

Its know-how enables it to ensure

- The effective control of its projects thanks to the project managers and the strong teams in each of their domains,
- Cost management, putting at the disposal of their clients, the economists and engineers, for a comprehensive analysis of global cost
- Management of timescales, by a process scheduling team
- Engineering works management through the efficiency of the directors and the works coordinators
- Technical innovation management through the involvement of experts in all fields and the creation of a specific research unit

AREAS OF ACTIVITY

SECHAUD BOSSUYT is called on by public and private clients

- Its main areas are :
- Hospitals

- Office space
- Prisons
- School and university buildings
- Shopping centers
- Sports and cultural centers

ASSIGNMENTS

■ General Construction and industrial engineering

SECHAUD BOSSUYT works alongside architects during building design and are involved in the following areas :

- Design work
- Engineering work
- Construction economics
- Study reports
- Process scheduling, management, coordination
- Project execution assistance for construction

■ Fluid engineering, structures and network utilities

SECHAUD BOSSUYT has undertaken projects in fluid engineering, structures and network utilities, and

Carried out specific assignments in the following domains :

- Technical support
- Technical design

- Study reports
- Expert evaluations

■ Specialised engineering

SECHAUD BOSSUYT offers specialised solutions with its experts in technical innovation in :

- High Environmental Quality
- Special structures
- Asbestos removal
- Flood Risk Prevention Plans (FRPP)
- Fire security systems.

The teams at SECHAUD BOSSUYT are organised in Expert workgroups and according to the project, work with other professionals (for example, surgeons and former hospital directors, for the health sector), in order to better answer to the client's needs, and thus provide a user oriented solution

GINGER
SECHAUD BOSSUYT

Network

The SECHAUD BOSSUYT group is located around France for a greater availability and proximity on each project whether regional, national or international.

SECHAUD BOSSUYT, engineering company, Subsidiary of the GINGER Group

GINGER is one of the first independent engineering groups in France.

It carries out operations in three expert workgroups :

- laboratory expertise,
- design engineering,
- maintenance engineering.

It is involved in all domains of the construction, environment and telecoms industries, including the most complex.
